

FACIAL PEEL

*Glycolic Acid Gel 30%
For Professional Use Only*

By: ROMULO MENE, MD.

INDICATIONS

Photoaging, superficial or deep wrinkles, dry and thickened skin and acne.

HOME PRE-TREATMENT

It is advisable to use home treatment products containing glycolic acid for at least 10 to 15 days before the peeling. This will generate a preliminary skin exfoliation, will normalize the skin's pH at physiological values (4-5) and will enable a first evaluation of the skin's tolerance to glycolic acid.

PRECAUTIONS

Inform the patient not to use depilatory waxes, electrodepilation and other abrasive or irritating substances 2 or 3 days before the peeling. Special care should be taken in cases of Herpes Simplex Labialis, where it is recommended to home treat the area with Acyclovir cream.

Inform the patient to avoid scratching, pull or submitting the skin, or in any way irritate the area being treated

Warning: Sunburn Alert: This product contains an alpha hydroxy acid (AHA) that may increase your skin's sunburn. Use a sunscreen and limit sun exposure while using this product and for a week afterwards.

PRE-PEELING PHASE

Apply **CHECK UP PEEL**[®] (Glycolic Acid Soap) onto dry skin, massage delicately until a light foam appears.

In order to increase the peeling action, leave the product on the skin for 5-10 minutes before removing with running water. Evaluate the skin's weak points, and avoid leaving the peeling for excessively long periods of time on the sensitive areas of the skin.

CAUTION

Apply **Neutralizer** or Vaseline over the areas that could be extremely sensitive (corner between nose and upper lip, labial commissure, small excoriations, etc.).

PEELING PHASE

GLYCOLIC ACID GEL 30%[®] is a chemical agent capable of stimulating the fibroblasts and produce new collagen in the dermis. It is a dense gel allows a handy application around the eyes and mouth. Apply using a fan brush. The purpose is to obtain a pink, uniform erythema.

NEUTRALIZING PHASE

The acid's activity is stopped by a specific neutralizer, applied all over the face and then rinsed thoroughly with abundant fresh water. Neutralizer is also useful at any time during the peeling phase whenever a premature penetration of the acid occurs in a specific area.

POST-PEELING PHASE

The specific product **NUTRI CREAM**[®] is indicated to heal and nourish the stimulated or irritated skin after a peeling. Apply 2 or 3 times a day for 3 or 4 days. **NUTRI CREAM**[®] can be used for other dry skin symptoms. The use of home care treatment products should gradually start after 4 to 7 days after the peeling.

PEELING SEQUENCE

It is advisable to repeat the peeling every 12 to 15 days.
